

Tomsk Polytechnic University, Russia
the 18th - the 20th of April 2017

V International Forum for Young Scientists "Space Engineering"

DEADLINES

- December 20, 2016 Registration for authors
- January 15, 2017 Paper submission (Matec Web of Conferences)
- April 2, 2017 Notification of Acceptance

MAIN TOPICS

1. Spacecrafts and Devices
2. CAD, CAE, CAM and PLM Systems for the Development of Space Technologies
3. Spacecraft Tests and Materials for Extreme Conditions Using
4. Electronics, Microelectronics, Telecommunications and Space Communications
5. Educational Trends in the Training of Specialists of Space Industry
6. Applied Aerospace Engineering

ABOUT TPU

Being the oldest engineering higher school in the Asian part of Russia, Tomsk Polytechnic University (TPU) has produced generations of graduates who have gone on to become leaders in all areas of society and industry. Since its foundation in 1896, TPU has always been a polytechnic institution with a wide range of research and higher education. Today we are a National Research university which places special emphasis on advanced engineering education, creation of resource-efficient technologies, internationalization and integration of research and academic activities. National Research Tomsk Polytechnic University founded in 1896 as Tomsk Technological Institute (TTI) of practical engineers. The Institute was opened in 1900 by the Russian Emperor Nicholas II.

VENUE

One of Siberia's oldest cities, Tomsk was Russia's frontier back in 1604. It is a university town, where one in five resident is a student, and it has an easy-going and youthful feel. Tomsk State University and Tomsk Polytechnic University are two major hives of activity in the metropolitan area. Be it for the students or otherwise, nightlife pulses into the wee hours. A partial list of museums in Tomsk includes a former secret police prison that operated from 1923 to 1944, an oil industry museum and a museum of wooden architecture.

Types of contributions: in person (oral)/ virtually (non-attending authors)
