Achievements in Research

I am focused on the acquisition of political communication in the sphere of international relations. On-going research is focused on the interdisciplinary field of philosophy of politics, political sociology, and political science. I conducted regional independent sociological research on a subject: "A political discourse on regional TV", "Influence of TV on the mass consciousness. The problem of creating socio-political programs at the regional TV". Engaged in the research the concept of "social action", social and philosophical problems of freedom of the media, TV hidden impact on mass consciousness the problem of the public sphere in the media. I was engaged in studying political programs of regional TV. At the moment I am working on the doctoral dissertation. The studies are focused on investigation of the hidden impact on mass consciousness in information society, technology of social manipulations and methods of its counteraction, mythologization and stereotyping of mass consciousness in the modern Russian society. In my research I pay special attention to the scientific works to research the new genre of public political discourse - the show politician who, both on federal and on regional television replaces all existing ideological receptions and practicing of television influence on audience. I explore the information anomie as a process that led to destruction of the communicative line. I explore the technology of «information warfare». I am the author of 25 publications, and have taken part in many International and All-Russian conferences. I have provided research to such organizations as the Ministry of Labor and Employment, Tomsk Regional Development Center and others.

Teaching Experience

I deliver classes for students of all bachelor degree and master degree programs throughout the University. I develop materials for the courses «Sociology» and «Philosophy»: lectures and seminars. I also developed special course «Engineering Creativity» for students of TPU Elite Technical Education. I teach students how to use the tool Mind Map for structuring information, effective thinking and storing large amounts of information. Studies: Sophrology,

foreign language (English), the technique of speech, heuristic techniques and methods of teaching students, teaching the practice of elite education TPU, modern methods of educational activities in Russia and Europe, information technology.

Services To the profession

I am employed as lead manager. I provide advertising promotion institute and Public Relations. I establish business contacts with the editors of scientific journals in Russia and international journals.

Summary: I regularly takes part in the Conference Organizing Committee Russian and international conferences.

Information technology

Fluent and frequent user of with Microsoft Office. Well-versed in the use of PREZI.
