

Course Description

Discipline/Course: HOW TO BLEND: E-Course in Blended Learning Training programme for university staff

- **Department of E-Learning Technology and Pedagogy**

Instructor: Svetlana B.Veledinskaya, PhD

Contact details: +7 913 805 4656, email: sbv@tpu.ru

Learning Outcomes:

- To assess the quality of blended courses
- To design course/unit level student learning outcomes
- To develop assessment plan aligned with SLOs using active learning approaches
- To create the plan of student learning activities in f2f and online environments

Course Objectives and Content:

In this course we will explore the model of blended learning and dive into key issues that help teachers to move from traditional f2f learning to BL. The course is for faculty members who plan to teach their courses with a blended learning model.

The objective of the course “How to Blend” is to identify specifics and quality aspects of blended and online learning and develop competence in designing learning process for Blended Learning model.

Course Outline:

Week 1 – Introduction and blended learning models: the secrets of effectiveness

Week 2 – Designing student learning outcomes

Week 3 – Active learning strategies for online environment

Week 4 – Web 2.0 approaches for active learning

Week 5 – Developing course assessment plan

Week 6–7– Integrating face-to-face and online activities

Week 8–9 – Blended learning quality assurance standards

Course Delivery: 9 weeks

Prerequisites: Basic Level of E-learning Proficiency; other prerequisites: N/A

Co-requisites: Disciplines of different aspects of using LMS Moodle

Final Assessment: defense of final work (design teaching unit associated with one blended learning unit of the course)

Course Developer: Svetlana B.Veledinskaya, PhD
