# Endangered species in Canada

**Student:** Iganova E.A.

**Group:** 13190  
**Faculty** of Natural Sciences and  
Mathematics

# Content:

1. *Introduction.*
2. *Endangered species of animals.*
3. *Organization for the Protection of endangered species in Canada – SARA.*
4. *Conclusions on the issue.*

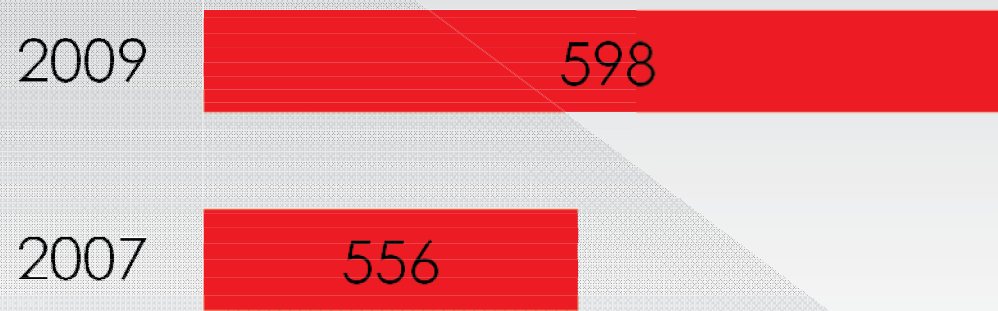

# Statistics of endangered species:

2009

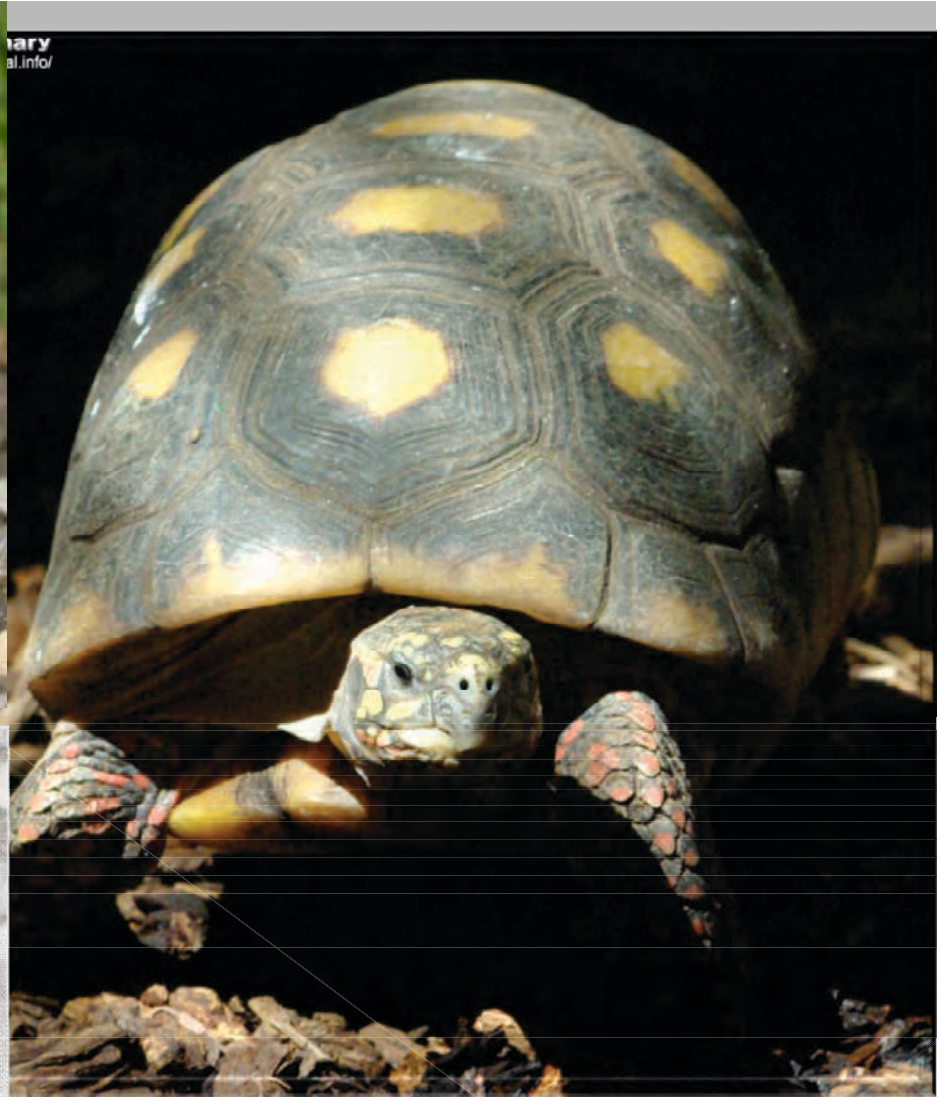

598

2007

556

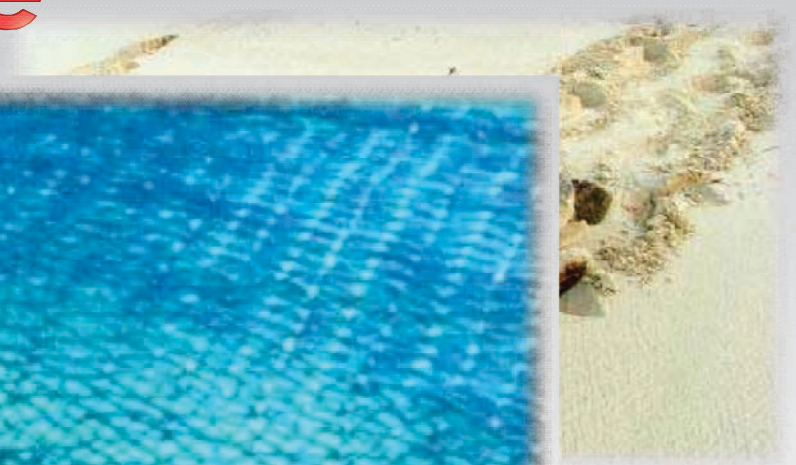

Wood Turtle

# Loggerhead Turtle

# Eastern Rattlesnake

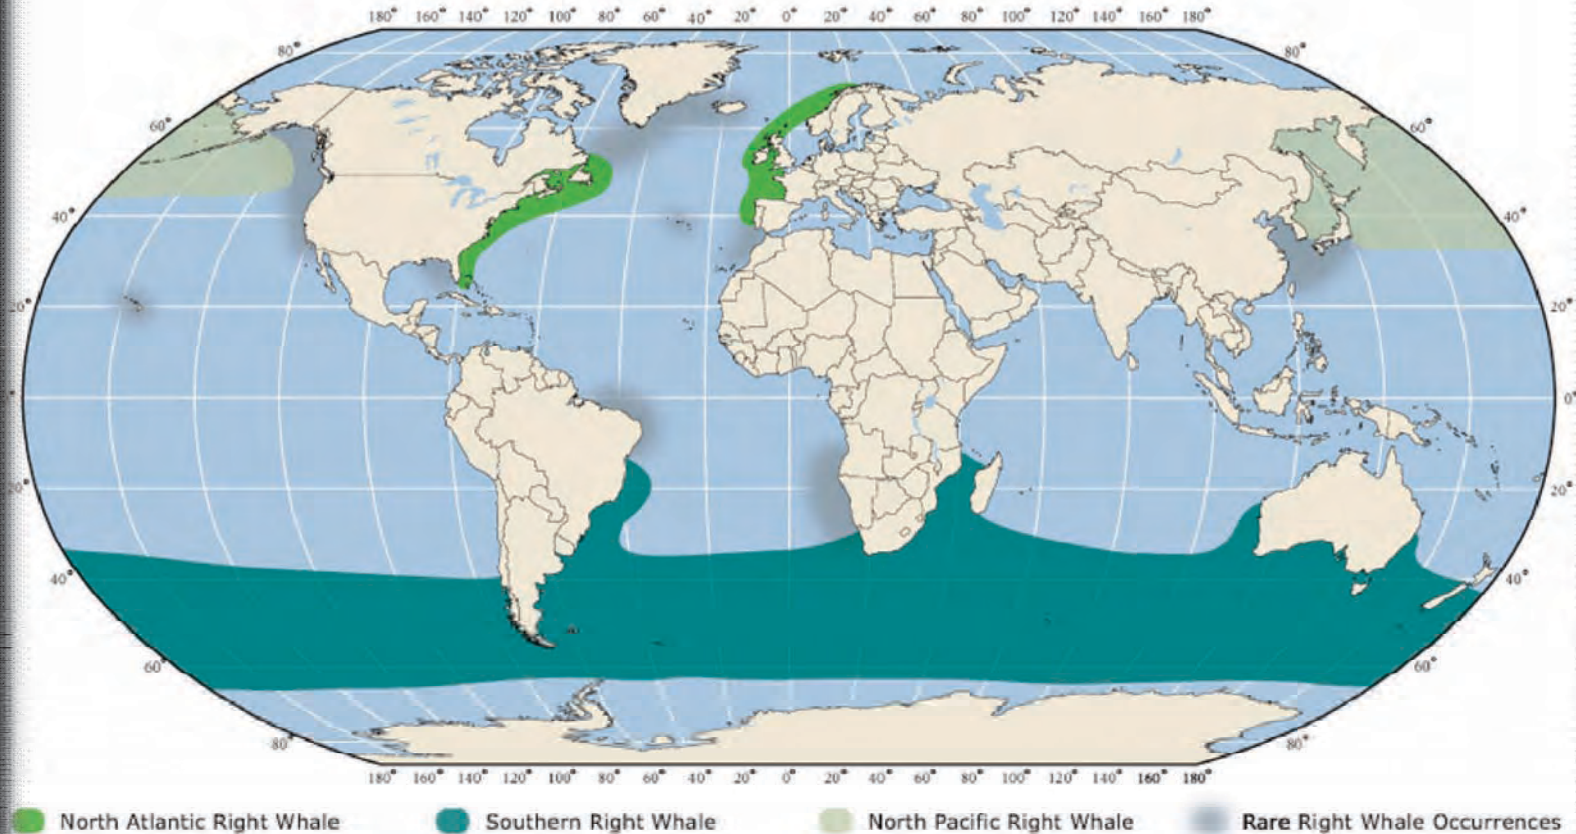

# THE NORTH ATLANTIC RIGHT WHALE

## Worldwide Right Whale Distribution

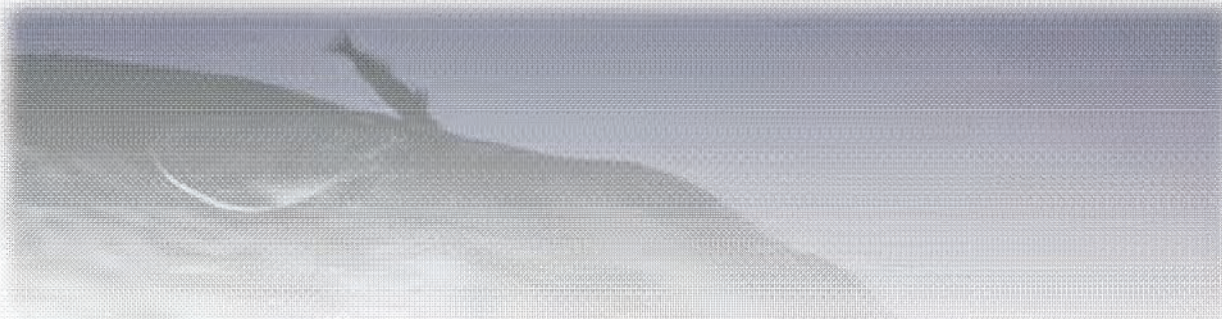

Cartography by: Kerry Legucux  
Sources: Kraus and Rolland (2007), ESRI.

After almost 1000 years of whaling that brought the species close to extinction in the early 20<sup>th</sup> century.

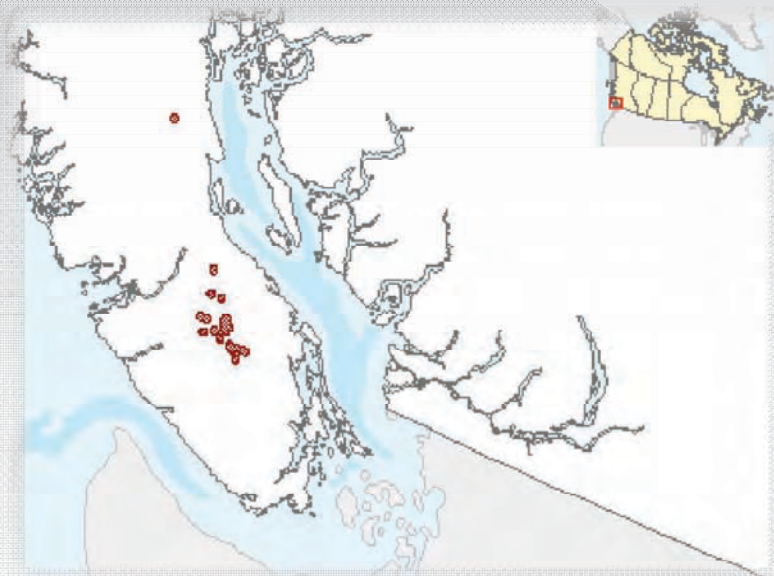

# Sei Whale

MONICA ZANI / NEW ENGLAND AQUARIUM

**The Vancouver Marmot is endangered because their habitat is being destroyed by the development of sky slopes.**

# SEA OTTER

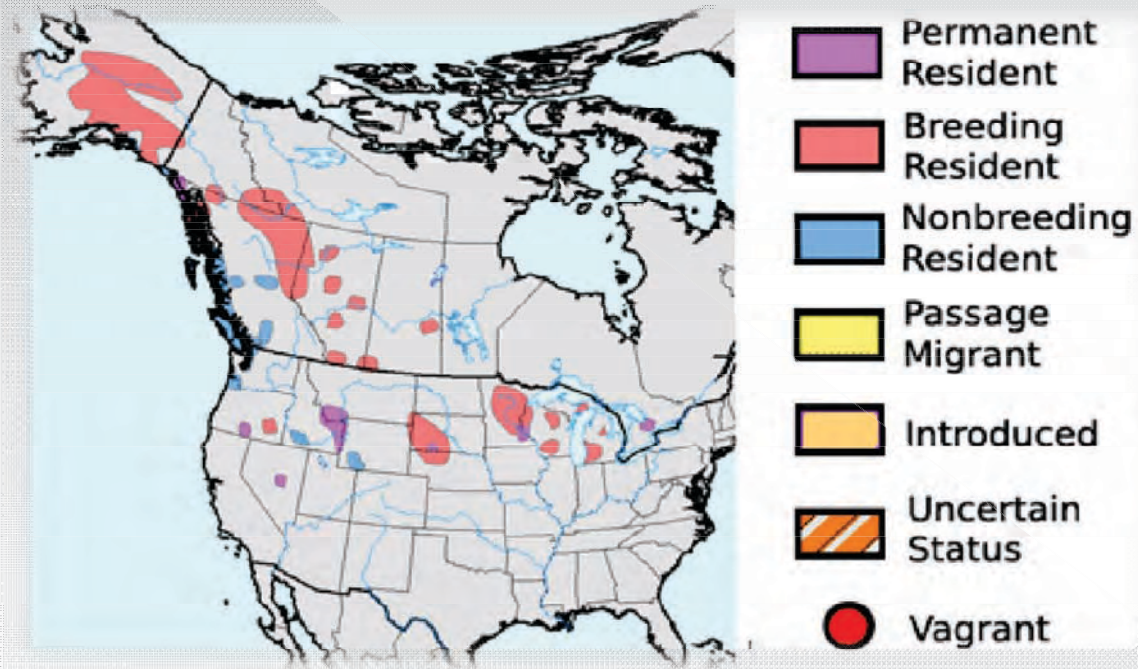

# Trumpeter Swan

The trumpeter swan was once a common nesting bird in the north, west and central part of America.

Now : Trumpeter swan presently number about 5000, they almost have been removed from the list of endangered species.

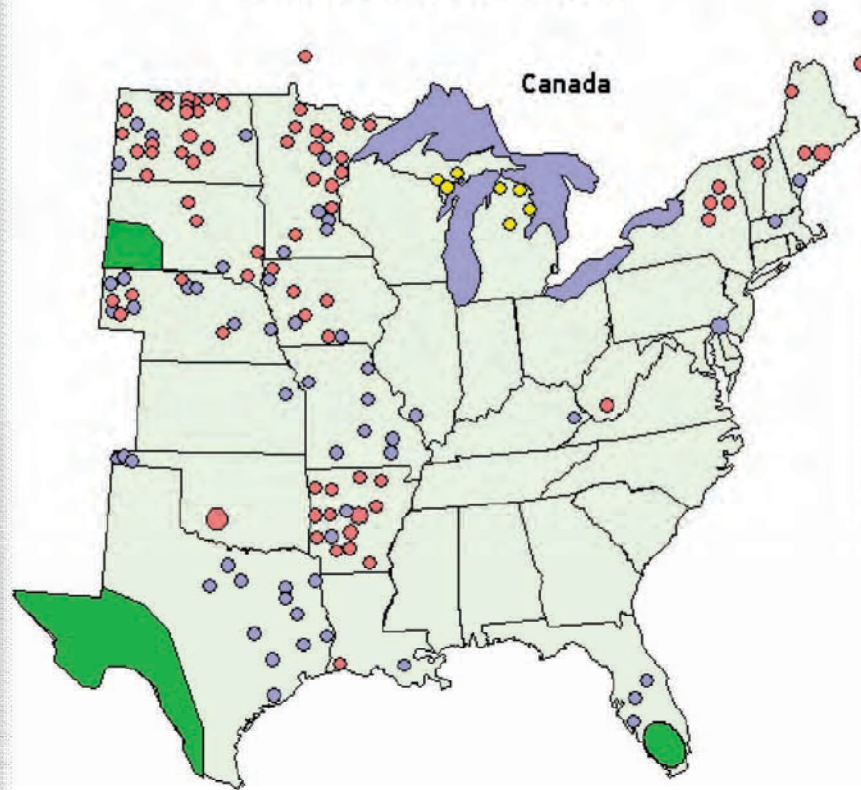

# Eastern Cougar

Cougar Confirmations/Probables: 1990 to Present  
Eastern Half of North America

## Vital Signs

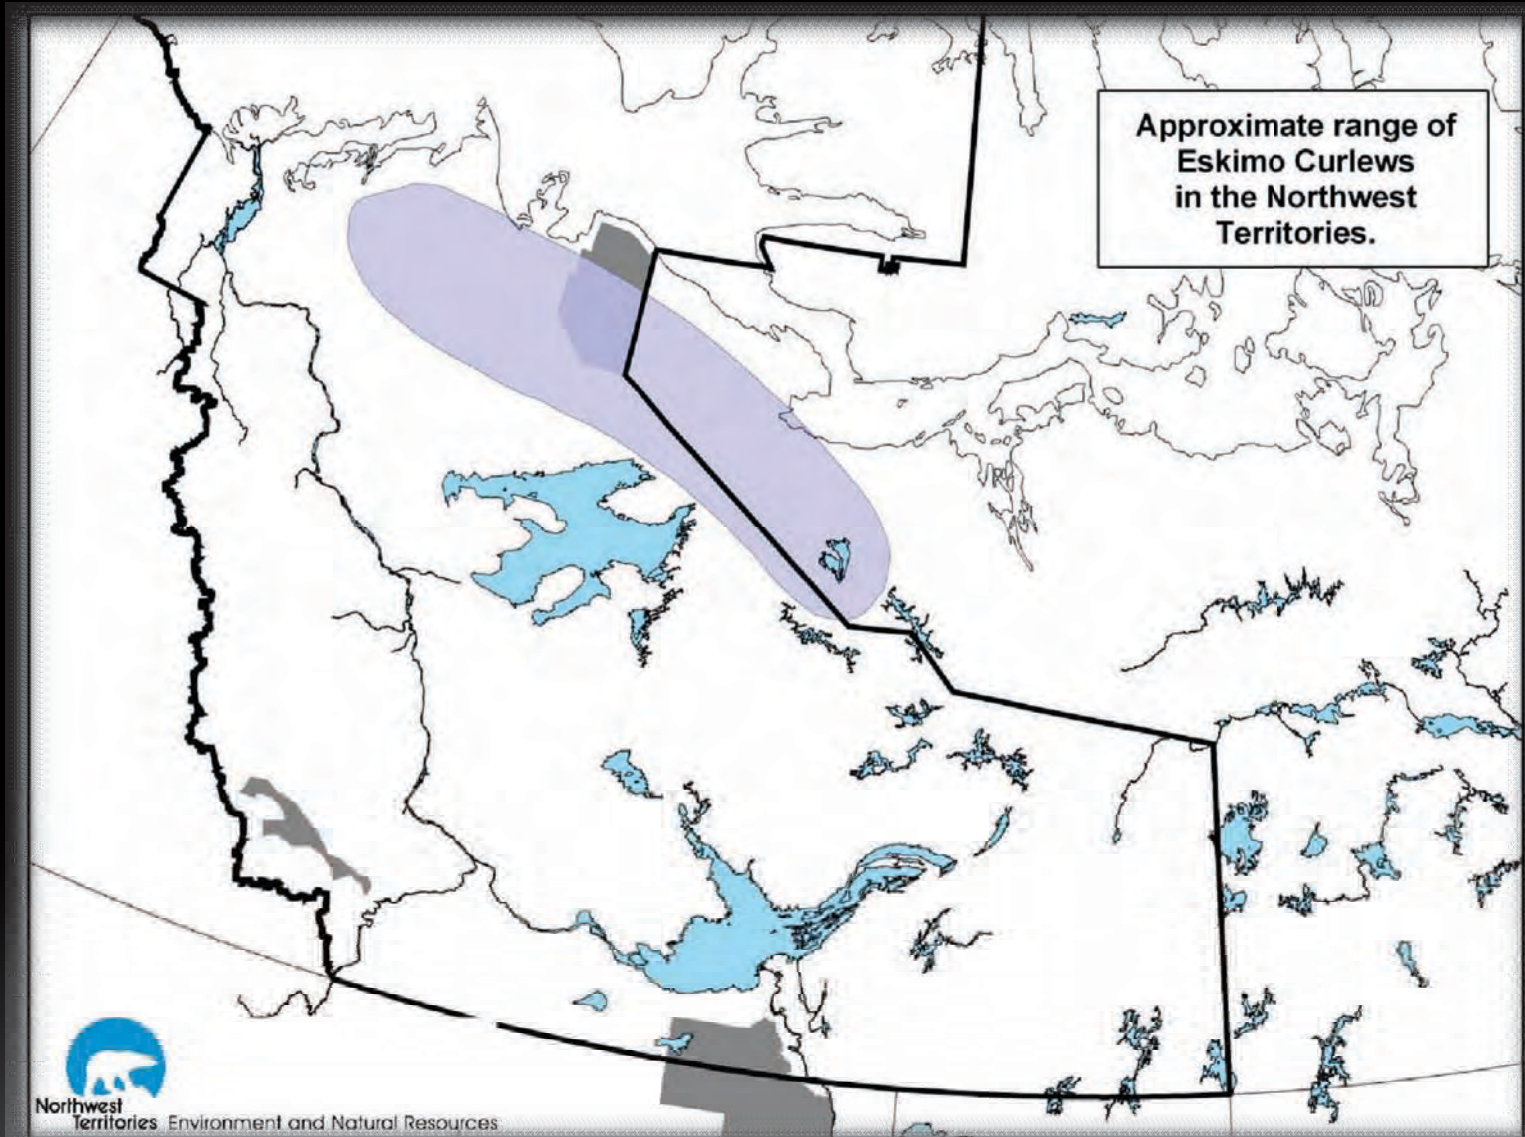

Common name: Eastern cougar  
Status under SARA: Data Deficient. In 1978, the eastern subspecies was declared "endangered" by the Committee on the Status of Endangered Wildlife in Canada. The status was re-examined in 1998, and the animal was designated "data deficient" because there was not enough data to evaluate the status of the animal or its classification as a subspecies.

Range: Ontario, Quebec, New Brunswick, Nova Scotia

Life Span: Unknown, but possibly up to 21 years

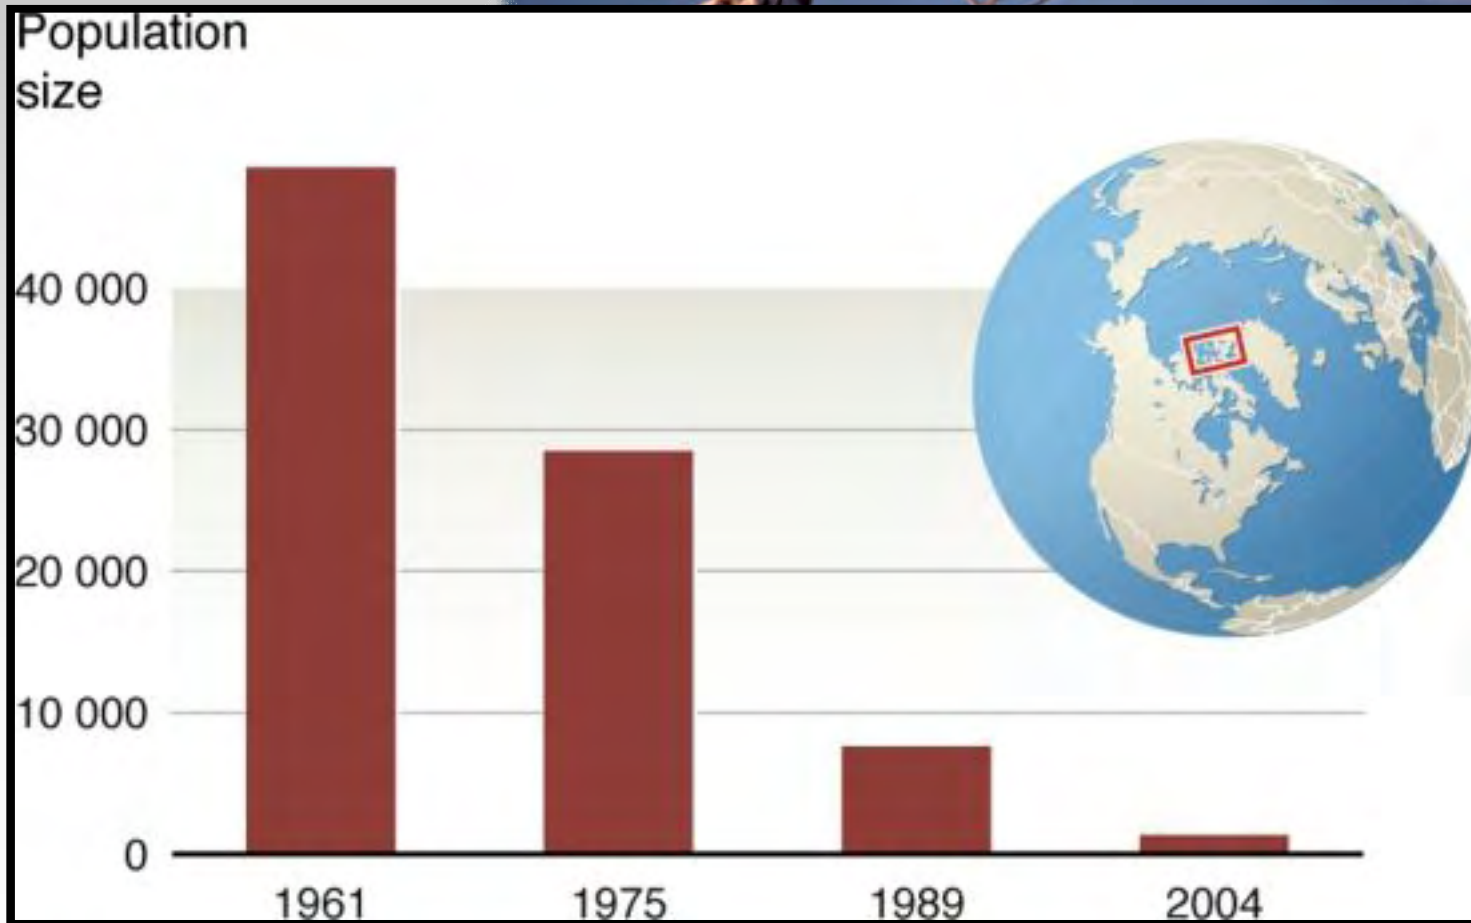

# ESKIMO CURLEW

Now almost extinct, this shorebird once migrated in huge flocks between its remote breeding grounds on the taiga to its wintering grounds in Argentina.

# Peary Caribou
